# COSMIC EXODUS

Oddly mesmerizing occurrences in the cosmos, that appear to be random at first glance, have been sighted and captured by various space probes. Everyone is intrigued at what it could possibly mean.

By observing and studying these fascinating anomalies, it was determined that they represented some sort of space and time breach. Using the most powerful self learning AI quantum computing machine it was possible to obtain an idea of the timing for the next Exodus manifestation! Going further, more research must be conducted from the data collected.

Specially-designed probes have been set to deploy as soon as another anomaly appears, as the full capabilities of the vortex are still uncertain. The force field generated by it seems to be absorbing whatever comes near it... possibly sending it to another world, another reality, or even another dimension! We're hoping one of them will manage to send back some relevant data for further analysis.

It's happening! Alert! Alert!

Our predictions were correct and the mission to send a research probe into the Cosmic Exodus has been completed. Now for the worst part: Waiting for results. We have no assurances that it will actually work, so let's hope for the best and deal with the rest.

Ding ding!

We just received the data recorded from one of the probes... and it's astonishing!

There appears to be some sort of field of gravitational force, usually associated with a massive object with a dense core. It causes the signal to crash and go offline momentarily. Let's hope the signal comes back...

Sadly, the footage we received a few hours later is very dark, but it seems we are inside a planet! It's impossible to not be thinking about what is happening on the other side at this point, the peculiarities of the Cosmic Exodus and its wonders, or if there are life forms of any kind. What kind of secrets lie within?

So many questions, so few answers...

This requires a deeper investigation...

Perhaps sending a team of volunteers is not the worst idea? We will need to set up a research base over there in order to explore further.

Are you up to the task?

If you are, sign up!

# TOKENOMICS

Ticker: \$ticker

Total supply: 100,000,000

Cosmic Exodus ecosystem tokens were created with the sole purpose to unlock the full extent of the existing content gameplay (i.e. Heroes, Companions), as transactions of value between player to player (i.e. swap resources, items) or as means necessary to progress the game content (i.e. open loot box, upgrade assets). They can be obtained either by regular DeFi mechanisms or by playing and reaching certain achievements in the game.

## USE CASES

**DeFi and Yield farm applications**

**GameFi and NFTs activities**

**Governance - DAO voting power**

**Ecosystem fees discount**

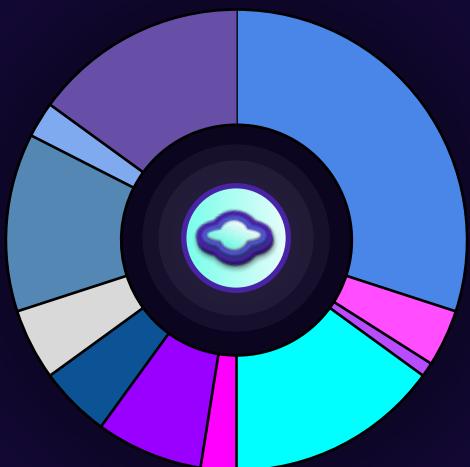

# DISTRIBUTION

Public Listing: dd/mm/yyyy

Vesting Model: linear

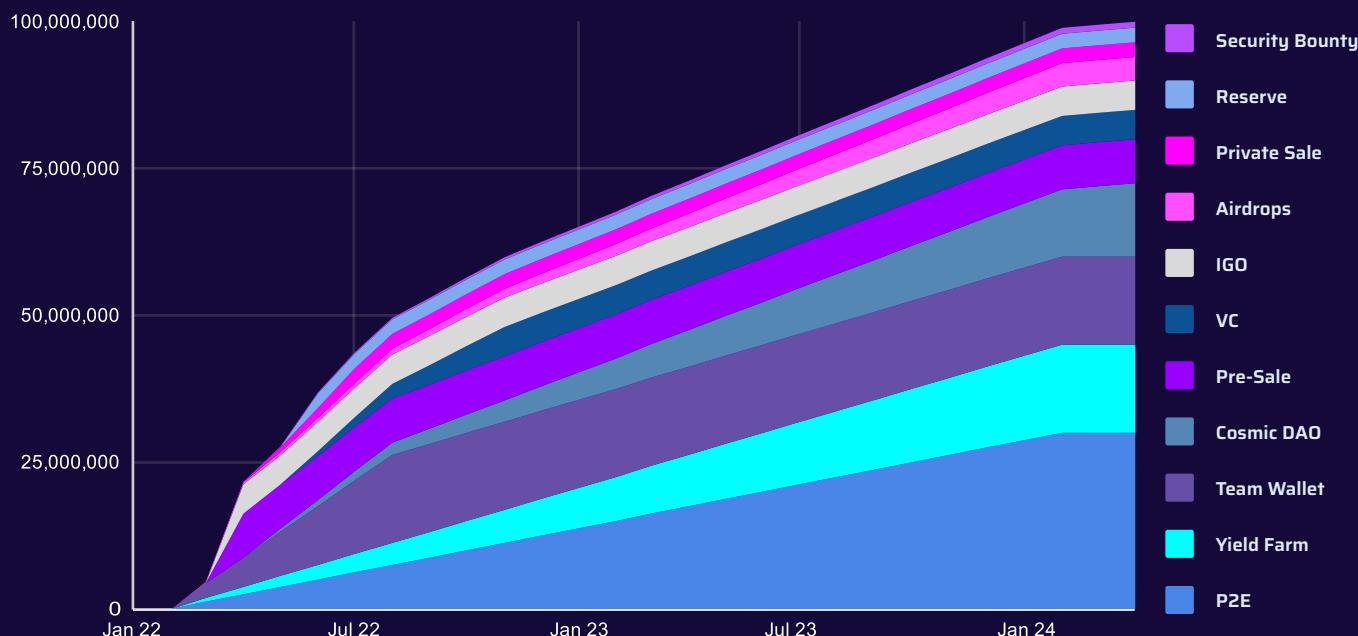

## TOKEN ALLOCATION

	LOCKUP	VESTING
● 30% P2E	24 /m	
● 4% Airdrop + Giveaways	24 /m	
● 1% Security bounty	24 /m	
● 15% Yield Farm	24 /m	
<hr/>		
<b>50% COMMUNITY TOKENS</b>		
● 2,5% Private Sale	1 /m	3 /m
● 7,5% Pre-sale	3 /m	3 /m
● 5% Venture Capital	3 /m	6 /m
● 5% IGO		3 /m
<hr/>		
<b>20% FUNDING TOKENS</b>		
● 12,5% DAO	2 /m	24 /m
● 2,5% Reserves	3 /m	24 /m
● 15% Team Wallet		6 /m
<hr/>		
<b>30% TREASURY TOKENS</b>		

## CIRCULATING SUPPLY

This may be subject to change before public listing

# PRIVATE SALE

Tokens Available: 2.500.000 \$ticker

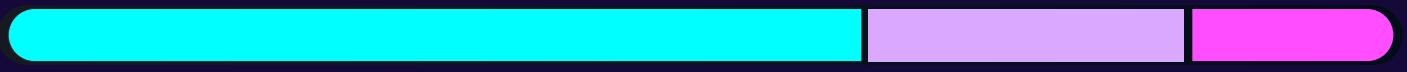

Minimum capitalisation: 75.000 \$

This seed funding round will be attended mostly by team members and old partners from previous projects. It's an event by invitation only and given as a reward to those who made this project possible. If a "non team member" is shown to be of interest for the project success an exception might be arranged.

The tokens exchanged here will only be able to trade directly with the Cosmic DAO Fund.

Use of private sale funds:

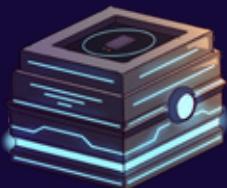

📢 Marketing - **20%**

🎮 Development & Operations - **70%**

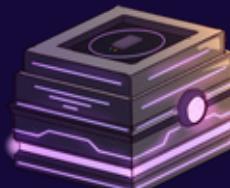

💰 Reserve - **10%**

Loot Boxes:

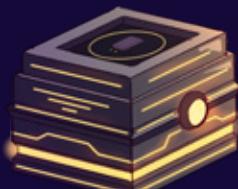

**Rare**

Token price: 0,175\$  
Investment: < 2.500\$

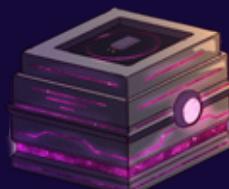

**Epic**

Token price: 0,15\$  
Investment: < 5.000\$

**Legendary**

Token price: 0,125\$  
Investment: < 10.000\$

**Cosmic**

Token price: 0,10\$  
Investment: < 25.000\$

*Tokens that have not been used in the private sale may be used for OTC exchange, if a valued partner is found.*

# REVENUE FOR PLAYERS

You may be wondering, how does this all work?

## GameFi & Play 2 Earn

When having fun allows you to monetize time invested, it's certainly a concept worth exploring and participating in! The new metaverse and GameFi experiences allow players to be the real owners of their assets and be an integral part of the game economy, bringing more value to the community while increasing decentralization.

## Marketplace

The Marketplace was designed to empower users of the ecosystem, to develop a sustainable ingame economy and monetize players' time. Among other things, it allows you to buy, sell or even rent assets.

## Grinding

By completing dungeons, exploring the game content, finishing quests, participating in special time events or when visiting the Cosmic Shop, players will be able to find certain types of assets. Depending on your profession and level of skills, you will be able to transform these items into more refined equipment! This will allow any player to become a market maker and participate directly in the game economy.

# COST TO PARTICIPATE ?

## Free 2 Play Mode

For players who just want to test the game mechanics, specific dungeons or just have fun with no initial investments, there is a Free to Play game mode. This is not designed to be profitable for users and might be susceptible to advertising campaigns.

## Assets for P2E

Did you enjoy the game? By providing liquidity to the protocol (Yield farming), users will be able to earn assets over time. This system is designed to sustain a non "Pay to Win" game style and ensure longevity of the protocol rewards (estimated approx. 2 years).

## Ecosystem Taxes & Network fees

There are different kinds of taxes associated with the Cosmic Exodus protocol, depending on the application you're using. Those are always displayed in a clear, transparent and verifiable way. To remind players that network fee's will always be subject to unexpected volatilities on cost per transaction, NFT mints, or "gas token" price increase.

But wait, there's more !

### Watch ads, get reward

What if you could watch an ad and get extra energy? Learn to play a new game and get some assets to try it out?

Learn and Earn, coming soon to the Cosmic Exodus!

### Be active, get gas back!

Log in every day and complete the main quests in order to receive juicy rewards!

Active players will be able to get some free gas as a compensation for their commitment.

# **READY, SET, TAKE-OFF!**

Many volunteers have signed up for the training and have been waiting for the moment to jump into action. There are many risks associated with this mission and there are no guarantees of success or anything in return, for that matter.

Being a pioneer is not an easy task, but just the experience itself can be rewarding, for sure! The most important things are to have a good time and to cooperate with others while contributing to community development. It's a fresh start, so we better make the best out of it!

# PROCEEDS MODEL

Funds generated by the fees displayed below will be sent automatically to the Cosmic Treasury Fund. This information will be verifiable and displayed in a transparent way for everyone. It's possible to obtain fee discounts by sharing your #USERCODE and promote player adoption!

Fees on Cosmic Marketplace:

RENT SELL BUY

	<b>Items</b> Resource packs, materials, you name it!	2%	1.5%
	<b>Equipment</b> Made by players, for players!	2%	2% 1.5%
	<b>NFT's</b> All the F2P, P2E, collectibles and game assets you can find!	2.5%	2% 1.5%

Other kind of fees:

The Marketplace is not the only revenue source for the protocol. Below, it's possible to find more information regarding other applications within the Cosmic Exodus ecosystem.

## Cosmic Shop

Find discounts for the most wanted assets!

## Sanctuary

Love is not the only thing a companion needs.

## Workshop

The player must contribute with \$sticker in order to complete the desired action.

## Dungeons - Epic runs

Are you a competitive player? Then you will enjoy the Epic runs!

## Cosmic Rituals

Participate in special Cosmic Rituals and collect rewards with prayers!

# REVENUE STREAMS

# STAGE 0

# THE ARRIVAL

Veni, Vidi, Vici!

The land of opportunities, where the most brave and keen tend to be ahead of the majority.

Prepare your base to suit **your needs** and your preferred approach. Always think a step ahead if you want to prevail!

Take your time to go through all the information available, so you can make the best informed decision.

**Always DYOR (Do Your Own Research)!**

# BUILDINGS

---

Each building has unique requirements in order to be built and used. Players must collect all necessary materials and the schematic for each specific building.

Constructions in general contribute to a certain use case or application within the ecosystem, making a more immersive experience and providing bigger incentives for those who progress ingame content.

coming soon..

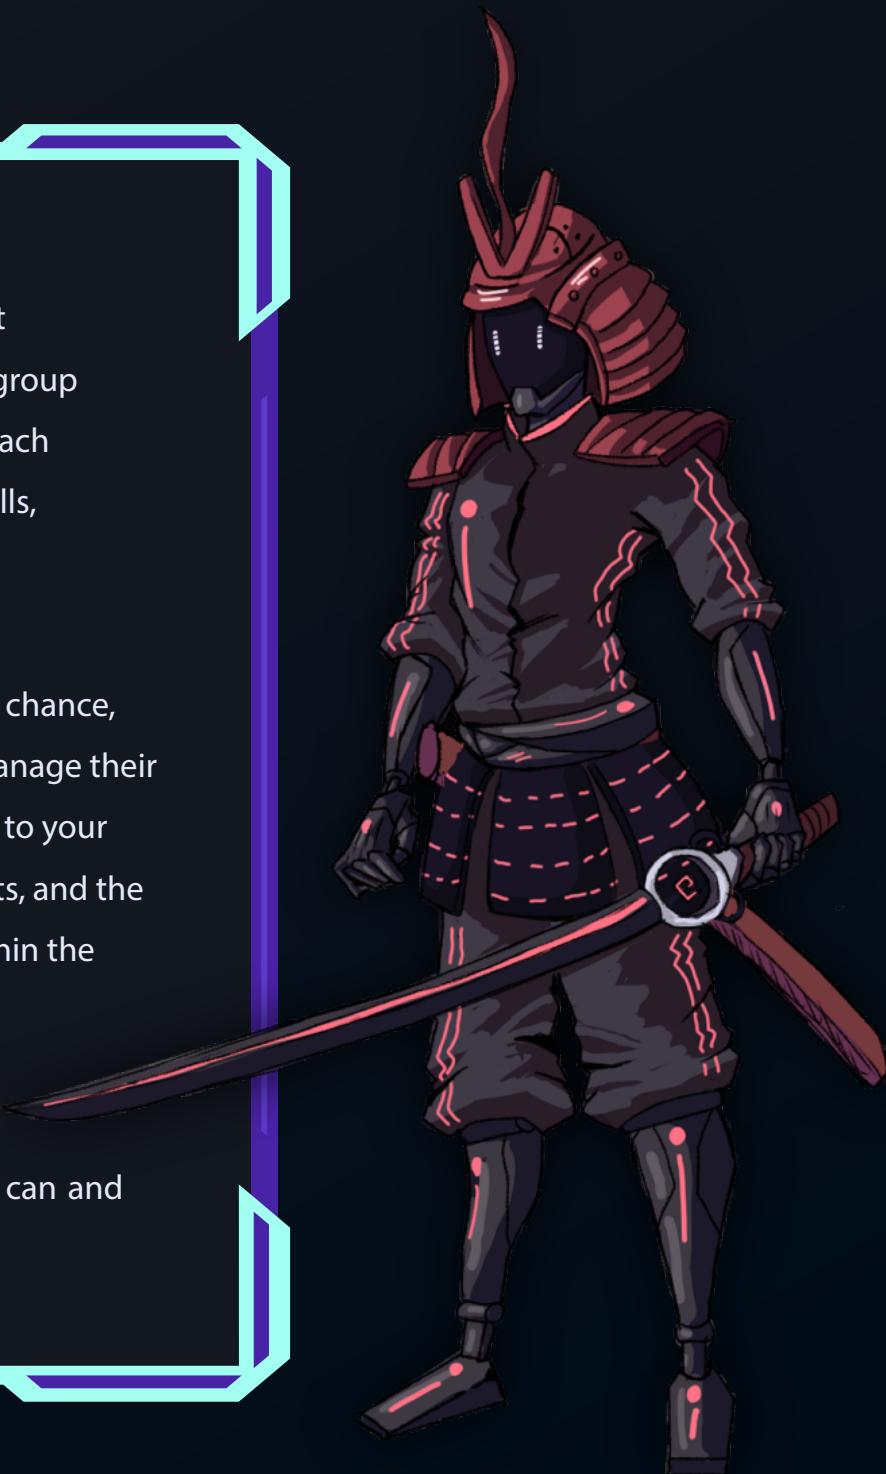

Here you can find details of the **Buildings** and their applications

# HEROES

To fight in the relentless environments, facing the most outstanding achievements, a group of selected heroes emerged. Each one with its own perks and skills, ready to be deployed at your command!

Everyone starts with the same chance, but it's up to each player to manage their assets and upgrade according to your strategy, the map requirements, and the time you have to dedicate within the ecosystem.

Build the strongest team you can and show what you are made of!

coming soon..

Here you can find details of the  
**Heroes** and their applications

# COMPANIONS

coming soon..

Here you can find details of the  
**Companions** and their applications

There are some life forms within the Cosmic Exodus! Some of them are very exotic-looking while others are very frightening to those with sensitive eyes.

Some pioneers have reported that their pets have acquired traits and habits from their owners. It seems that the more interactions and care they receive, the stronger the connection gets.

Each species of companion have males and females, so make sure you don't leave them together for too long... or you might have another little mouth to feed!

Please remember that each companion has an expectancy of time to be around, so try not to get emotionally attached to it!

# TROOPS

coming soon..

Here you can find details of the  
**Troops** and their applications

What's better than having a fearless  
soldier ready to face anything that comes  
near it?

A garrison of those soldiers, yes.. you  
guessed it right!

Need a strong and reliable front line?  
"To protect and serve, with no fear or  
questions."

Perhaps some help taking down  
those pesky runners?  
"Any orders are absolute and  
followed with excellence."

Have you prepared your support  
line?  
"Have faith in our prayers."

For sure they come handy, those  
are the troops, use them wisely!

# TOWERS

---

When things get rough and the enemies keep spawning, there is not much to think about..

Hit one after the other, smashing any incoming packs!

Sometimes it doesn't matter how much willpower or how good of a plan a player has, if the defenses are not enough to sustain the waves of Kairos' forces.

What happens when your setup of heroes, troops and companions is not enough?  
It's time to get some extra firepower!

There are 5 different types of towers to assist you in battle and each one has a specific application and use case.

coming soon..

Here you can find details of the **Towers** and their applications

So much to explore, so much to survey!

We never know what we may find laying around. Maybe some pristine sources of precious and rare materials, or perhaps another adventure full of mystery and tests to the boundaries of those who dare to step in it.

**The Cosmic Exodus is full of surprises!**

# EXPLORATION OF THE OUTPOST

# RESOURCES

---

There are different types of resources  
within the Cosmic Exodus.

**Health points** - At the start of each dungeon, players have 5 health points. Every time an enemy manages to finish its course, you will lose 1 HP. Once all health points are lost, the dungeon ends.

**Energy** - Players need energy in order to access gameplay content. This is intended to act as a “spam filter”, limiting the number of actions a player can do everyday. It’s cool to have fun, but we have to keep it healthy!

**Each one with its use case or application.**

**Experience** - Experience - Having the right amount of experience can become very handy in tough situations. Usually, the more you get, the easier things appear to be. For each achievement accomplished, quest completed, or event participated in, players will receive experience points accordingly.

**Materials** - It's possible to find a diverse array of materials scattered around the Cosmic Exodus. These can be extracted and sent to the outpost by special machines and workers. The more dangerous the place is, the better will be the value of the resources found!

# QUESTS

---

It's always good to practice in different environments / situations to refine instincts and response times.

Exploring can be fun, but that's not the only thing you bring back home with you.

There is always a chance of discovering new sources of materials, items / equipment, new life forms or mysterious phenomena during quests. We never know!

At the least, you will be able to grind experience and get to know a bit of the universe if nothing else.

Players will be able to see available quests to perform at the Inn.

There is a limit on how many quests a player can do every day, so we recommend picking your best team!

# DUNGEONS

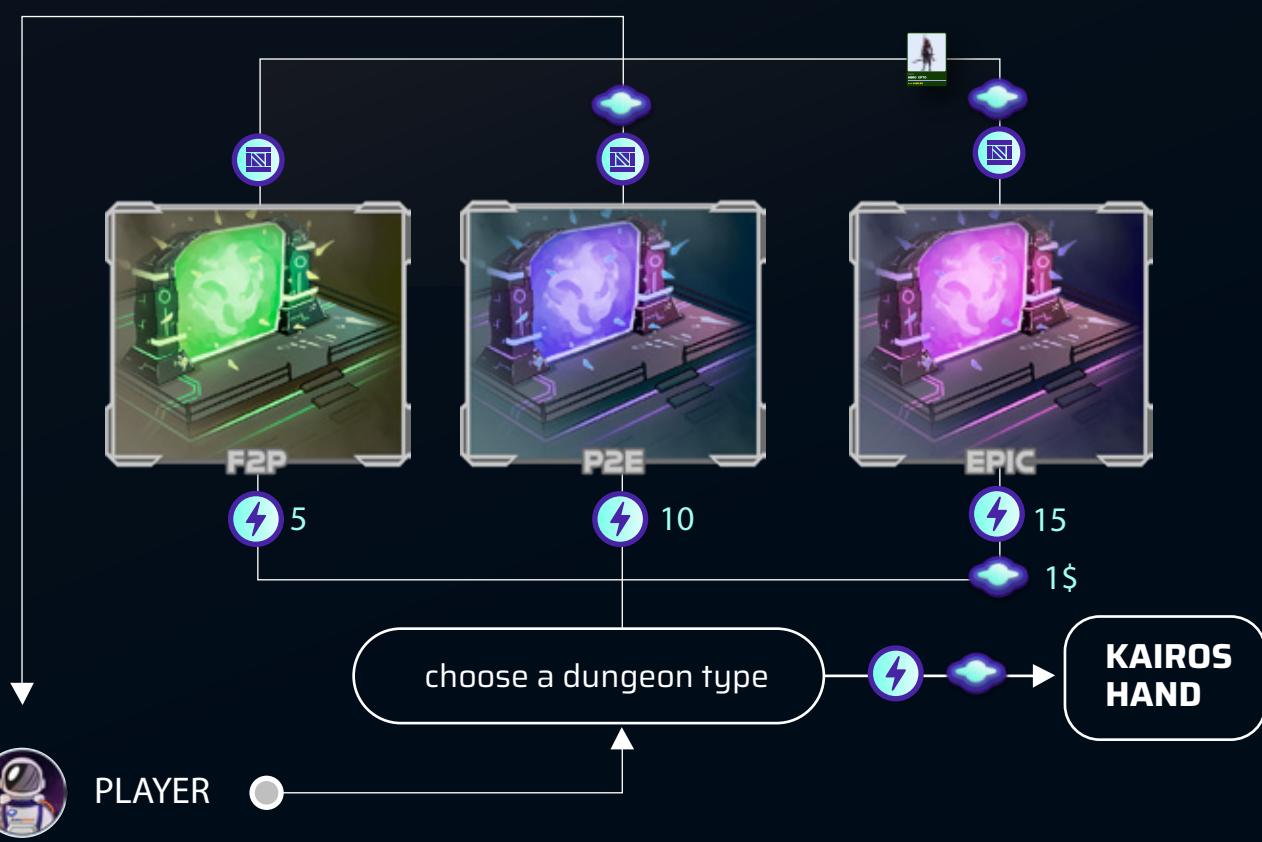

Facing the wrath of Kairos is not an easy task for the majority, that's certain.

For those who are looking to exceed expectations and test limits, entering a dungeon is a good way of doing so. Can you handle the pressure? Let's find out!

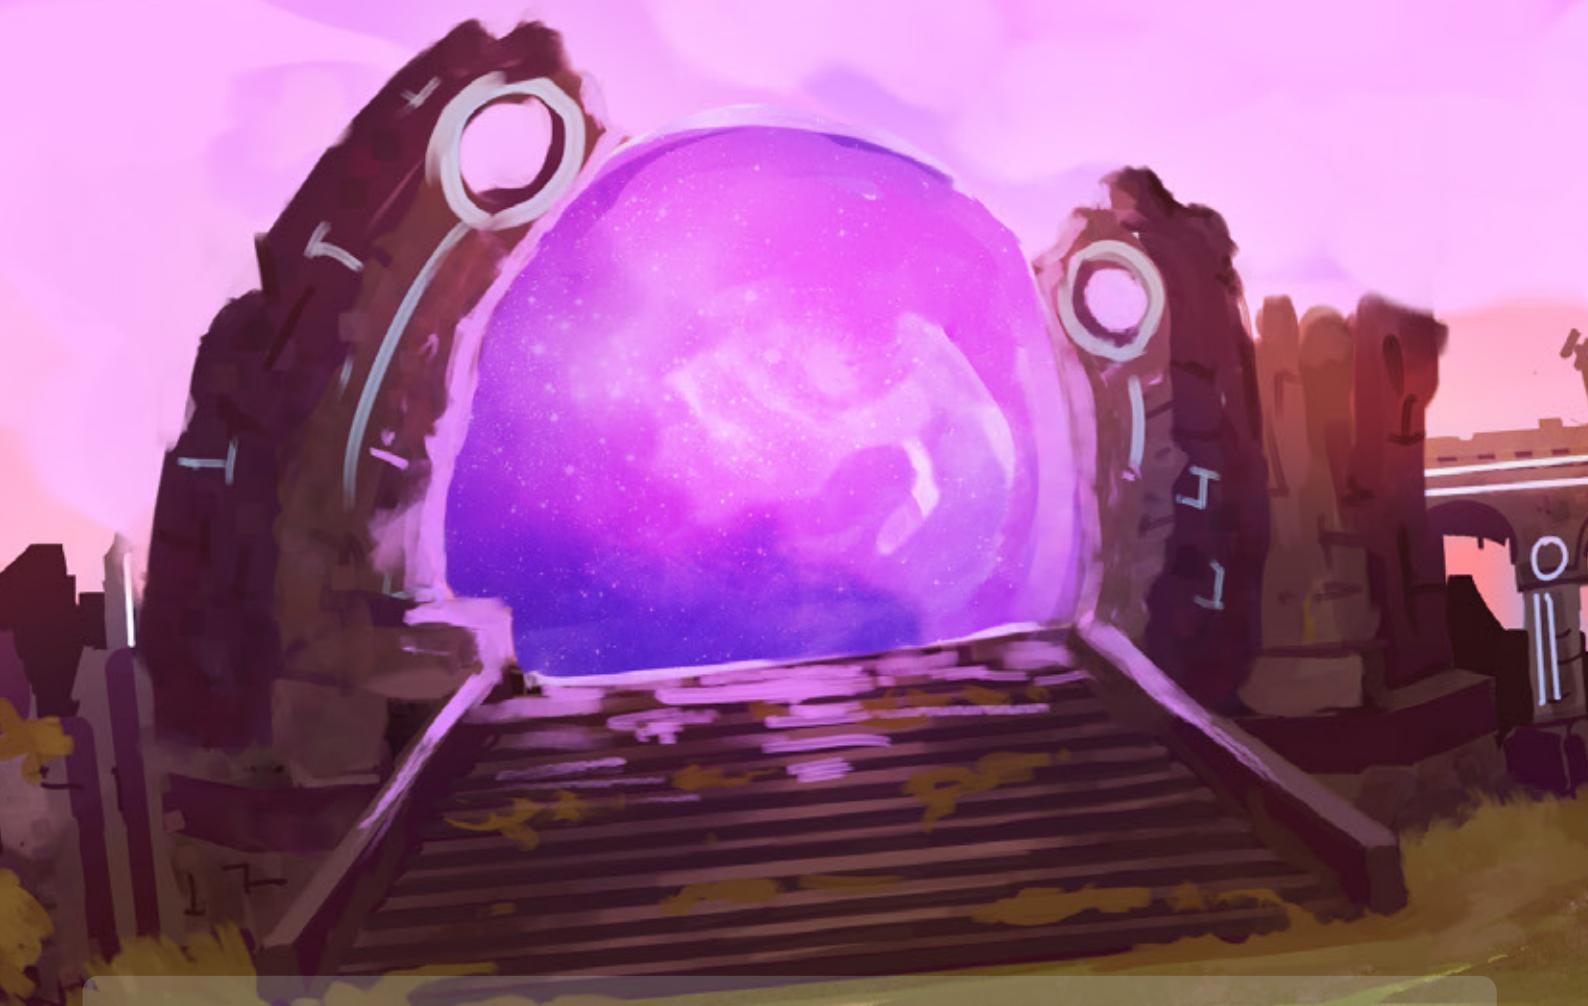

**Plan your tactics beforehand, assemble your best team and try out your skills!**

There are dungeons to practice (F2P), to grind for game progress (P2E) and Epic Runs (PVP) for the more competitive players.

Earn rewards through your achievements and accomplishments, but remember, every action you perform counts, so be wise!

# THE JOURNEY

It's not about where you're at today, it is about where **you want to be!**

We all have to start somewhere and everyone has the same starting point within the Cosmic Exodus.

The ones who keep a pristine discipline and work to become a better version of themselves every day will be at the top, looking down upon those who couldn't keep up.

This isn't a sprint, it's a marathon! Practice makes perfect and the more you do it, **the further you can go!**

# EQUIPMENT

---

How do you know someone is a pro, just by looking?

By the equipment displayed, obviously!

There are different types and categories of gear, depending on the use case and application.

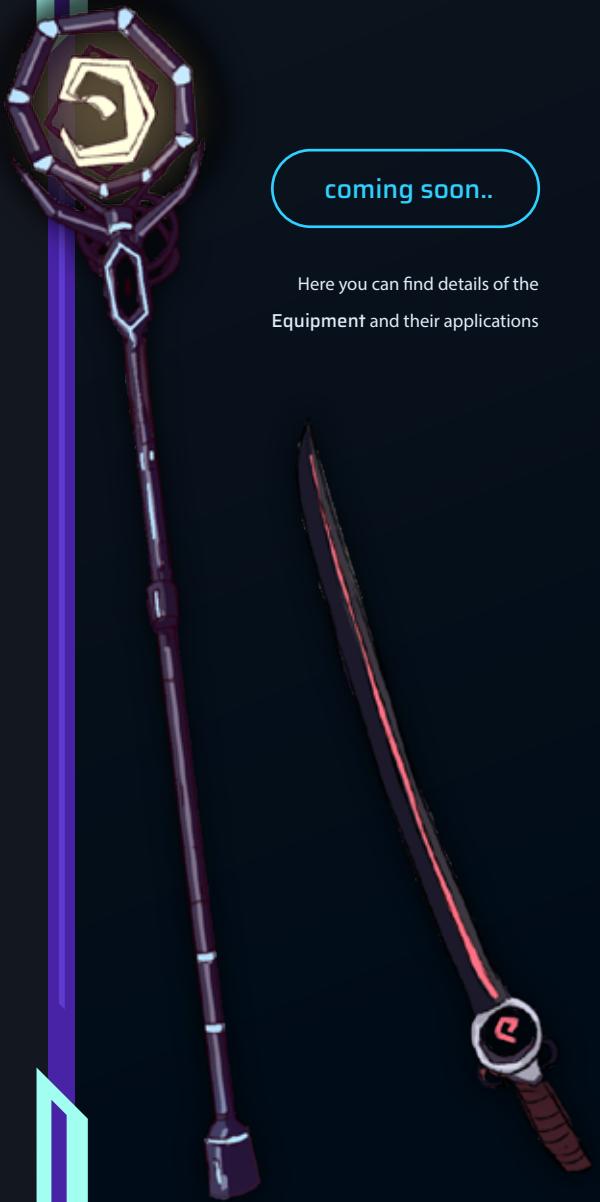

Some are cheap, but definitely wear out quickly.. It's also possible to find the most exotic pieces, blended with the rarest materials available, for those who can afford it.

Either you make it or you get someone to do it for you. Yes, it's that important to be the best equipped as possible at any moment!

That is how you manage to move further after all.

coming soon..

Here you can find details of the Equipment and their applications

# ITEMS

---

With so much equipment required on a daily basis, it's also important to sustain the production and supply of the materials needed to make those assets.

Could a blacksmith work without a hammer? Could an apothecary create potions without vials to store them? Could a farmer raise livestock without feeders? Not ideal.. right?

There are multiple ways to find the items you need. For example, from an in-game NPC, a quest reward, from a wave pack or a boss drop, or at the Cosmic Shop.

Manage well your storage space though, because these will for sure be needed in abundance.

coming soon..

Here you can find details of the **Items** and their applications

# UPGRADES

## Question:

Are you ambitious enough to aim for the top ranks?

If you are keen on details, you must have already noticed that anything around Cosmic Exodus can indeed evolve into something greater. It's possible to upgrade your buildings, heroes, troops, companions, equipment and items. Why is this so important?

The better rank your asset is, the most likely higher use case and evaluation it has within the ecosystem. Are you having problems surviving or can't finish a game with full hp? Maybe it's time to grind and upgrade!

There is always someone eager to take the extra step just to get that edge against any competition.

# DAO - GUILD

---

The Cosmic Exodus team believes **sharing is caring**. We want to be as transparent as possible, with good communication established between players and the team.

## **More information = less FUD!**

For this project and ecosystem to truly reach its potential, a strong community is necessary.

## **Good code + Use case + Strong community = Unlimited Potential**

We believe everyone can bring good ideas and solutions for this project.  
We are listening!

It's also very important that players that have invested time and energy, dedicating themselves in the game, have a voice and a say in the ways things are done, or planned to be done in the future. For this reason, token holders have a determined voting power, according to the TVL staked in the project and the progress within the game content.

To whom it may concern, the DAO acts as a **foundation** for this project. With the intentions of gathering resources, allocating brain power and sharing responsibilities, **aiming for a better and more efficient** organization in the protocol growth.

# ACTIONS AND RESPONSIBILITIES OF THE DAO

---

Voting

Community Growth

Marketing campaigns

Burn and Buy-back  
allocations

Audits

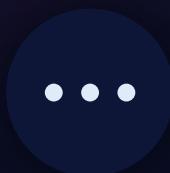

NFTs “safe floor”

Select partnerships

Events

Etc...

## P2E injections

Cosmic DAO Fund can be used to inject rewards into the P2E mode.

## OTC

Users can trade P2P, to reduce volatility and price impact on the token.

## Security Fund

The Cosmic DAO will be saving to build reserves, in case the protocol suffers any hacks or loss of funds.

# PARTNERSHIPS + COLLABORATIONS

---

We are looking for long term partnerships with pioneers in the space, which represent the values and use cases to the cryptocurrency community that are so much needed.

Projects which bring more **education** and mainstream **user adoption** will always be supported by us, including possible **endorsing, features and cross applications**, designed to innovate and sustain real growth and added value for all participants.

We truly believe in building for the future, adapting and overcoming obstacles by having powerful synergies and network effects within the developers community base.

We proudly present to you at our homepage the list and links of these associations.

**Enough of tribalism, let's unite instead!**

# **WITHSTAND KAIROS**

The background of the poster is a dark, star-filled space. A large, glowing purple sphere, resembling a planet or a celestial body, hangs in the upper right quadrant. In the lower left foreground, a large, white, textured sphere, possibly another planet or a celestial body, is partially visible. A long, dark bridge with glowing blue lights along its length stretches across the middle ground. The bridge appears to be made of wood or metal and is supported by several tall, thin poles. The overall atmosphere is mysterious and otherworldly.

# WITHSTAND KAIROS

---

Behold Kairos, the space and time god! He bears tremendous amounts of power that enables him to bend reality and awareness.

Deciding that Humanity must be judged and tested, he has created a boundless army in his own image, possessing reflections of his qualities, abilities, and traits.

## **Do you have what it takes?**

Each time you manage to deal with an incursion, expect it to become exponentially harder to overcome. You must be a quick learner and possess a keen eye for those relentless enemies approaching without warning. Make sure to be at the right place with the proper tools, if you wish to prevail.

On the bright side of it, those who manage to do well, are bound to reap the spoils of war and the rewards the ecosystem has to offer. Select the Heroes and their companions carefully, in order to extract the true potential of each combination.

## **Bring your A game, it's time!**

Having a proper attention to little details is crucial to be a part of the elite vanguard! It is highly recommended to research, create and upgrade for the best possible gear, keep an efficient management of your assets as well as the most reliable strategy to deploy against upcoming skirmishes.

## **Can you withstand the challenge? Kairos is waiting for you!**

# DISCLAIMER

---

There are general risks associated in cryptocurrency assets and DeFi ecosystems, such as pump and dumps, errors in the smart contracts or dApp's and malicious attacks by bad actors in the space, leading to the loss or inaccessibility of funds for the investors.

## **The team will never ask you to:**

- Transfer any funds for any reason whatsoever.**
- Input any private key or seed phrase at any point.**

Scammers and impersonators will always find a loophole and a perfect timing to strike, so the best we can do is to educate as much as possible our community for these bad situations, and how to proceed upon them.

**Users should always DYOR and never invest more than they are willing to lose. The contents of this document should not be considered as financial advice, but as educational purposes only.**

Cosmic Exodus ecosystem tokens were created with the sole purpose to unlock the full extent of the existing content gameplay (i.e. Heroes and Companions), as transactions of value between player to player (i.e. swap resources, items) or as means necessary to progress the game content (i.e. open loot box, upgrade NFTs).

The information publicly displayed by any team members and associates can be subject to change or deleted without any prior notice or warning.
